SUMMARY

As a passionate and dedicated MEA(R)N Stack Developer, I bring a robust background in designing and building dynamic, high-performance web applications. With a keen eye for detail and a relentless pursuit of excellence, I specialize in creating seamless user experiences through innovative front-end development and efficient back-end architecture

WORK EXPERIENCE

Intern at Luminar Technolab

May 2023 - Dec 2023

- Designed and developed an e-commerce web application with user authentication, product management.
- Built a real-time chat application featuring private and group messaging using WebSockets.
- Developed a personal portfolio website showcasing projects and skills, with a blog section for technical articles.
- Technologies used: MongoDB, Express.js, React, Node.js, JWT, Socket.io, GitHub.
- Completed an intensive 7-month MEA(R)N stack training, gaining hands-on experience through collaborative projects and coding challenges.

SKILLS

- Front-End: React, Angular, HTML, CSS, JavaScript
- Back-End: Node.js, Express.js
- Database: MongoDB
- Tools: Git, GitHub, Postman
- Other: JWT, RESTful APIs, MERN, MEAN

Education

APJ Abdul Kalam Technological University

BTech in Computer Science Engineering (7.1 CGPA)

June 2019 - June 2023

PROJECTS

- Project Management (MERN): Contributed to Project Management app with user authentication, profile customization, and search features
- Real-Time Chat (MERN): Developed Real-Time Chat app with user authentication, real-time messaging, and search functionality.
- E-Commerce (MERN): Developed full-stack E-Commerce platform with user authentication, cart, checkout, and admin role management.
- Book Store (MERN): Designed Book Store app with user authentication, book search, and customization options.
